

**B-Assured Solar Panel Service Package and Cleaning Agreement.**

As solar panels have no moving parts, very little service and maintenance is required. To keep your solar panels generating efficiently we recommend a Bi-annual or Annual service to ensure your system is kept in full working order and any fault or drop in generation is flagged immediately and resolved. With average rain fall most panels are self-cleaning, but depending on weather conditions, bird activity and overhanging trees your panels may also require an occasional clean.

Our B-Assured service package Includes:

- Check electrical contacts, connectors and cables
- Check Inverter settings, firmware and monitoring
- Check and calibrate safety and operating controls
- Check for proper voltage to equipment
- Check Solar Panels, clean and test for maximum output
- Check mounting and racking
- Cleaning Service

\*Service package: Annually RESIDENTIAL

3-5kw system	Afl. 325
